Professional Summary

Final-year Computer Science undergraduate with hands-on experience building and deploying production-grade full-stack web applications using React.js, Node.js, Express.js, MongoDB and REST APIs. Independently developed EasyBasket, a complete e-commerce platform, and co-developed Nivas360, a real estate application with real-time chat — both live in production. Seeking an entry-level developer or internship role to contribute clean, efficient code to a high-impact team.

Technical Skills

Languages: JavaScript (ES6+), Python
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, REST API, JWT Authentication
Database: MongoDB, Mongoose
Tools: Git, GitHub, Postman, Vercel, Render
Concepts: API Integration, Debugging, State Management

Projects

EasyBasket — Full Stack E-Commerce Platform

[Live](#) | [GitHub](#)

React.js • Node.js • Express.js • MongoDB • JWT • Tailwind CSS • REST APIs • Vercel • Render

- Built a full-stack multi-vendor grocery marketplace using React.js, Node.js, Express.js, and MongoDB with role-based access control for Users, Vendors, and Admins
- Developed secure RESTful APIs for authentication, store management, product lifecycle operations, order processing, and vendor-specific authorization workflows.
- Implemented JWT-based authentication, protected routes, product ownership validation, and store ownership checks to ensure secure access control.
- Integrated Cloudinary and Multer for image uploads and built features including product reviews, ratings, search functionality, and persistent cart management.
- Deployed frontend and admin applications on Vercel and backend services on Render, enabling a production-ready marketplace architecture.

Nivas360 — Full Stack Real Estate Platform

[Live](#) | [GitHub](#)

React.js • Node.js • Express.js • MongoDB • Socket.IO • JWT • Cloudinary • Tailwind CSS • REST APIs

- Developed a full-stack real estate web application using the MERN stack with JWT authentication, role-based access control (User, Owner, Admin), and protected REST API routes via dedicated middleware.
- Built property listing and management features with full CRUD operations, multi-image uploads using Multer and Cloudinary, and property search and filtering by city, location, type, and availability.
- Implemented a real-time chat system using Socket.io for user-to-owner communication with persistent conversation history stored in MongoDB.
- Engineered a wishlist system, owner request workflow, and a dedicated admin panel, with global state management using React Context API and a responsive UI built with Tailwind CSS.
- Deployed a scalable full-stack application on Vercel following clean MVC architecture with separated controllers, routes, models, and middleware for maintainability and scalability.

Education

B.Tech in Computer Science (Data Science)

2023 – 2027

Raghu Engineering College, Visakhapatnam

CGPA: 8.06 / 10.0

Certifications & Achievements

- **NPTEL Elite Certification** — Programming in Java (IIT-level national assessment)
- **JavaScript Course Completion** — Infosys Springboard
